

Product Safety Information
AT41

Please read this safety information before you use the device. Following the warnings will help prevent injury to yourself or others and damage to your device.

General Safety

	Read the Safety Information before using this device. Failure to comply with safety warnings can result in serious injury.
	Keep away from pacemakers and other personal medical devices.
	Follow the instructions given by any respective medical facility regarding the use of Wireless devices on their premises.
	Switch off in explosive environments.
	Avoid contact with liquid, keep your device dry.
	Do not dispose of this device or its battery in a fire.
	Avoid Extreme Temperatures.
	Do not attempt to disassemble your device.
	Do not rely on this device for emergency communications.
	Only use approved accessories.
	This device is not intended for use by young children. If you allow a child to use it ensure the child is strictly supervised. This device contains small parts which are a choking hazard.
	Do not take out your micro-SIM card unnecessarily. The micro-SIM card may be easily lost or it can be damaged by static electricity.
	For body-worn operation maintain a separation of 20 cm.

Distraction

Driving

You must exercise proper control of your vehicle at all times. Give your full attention to driving. Observe all of the recommendations contained in your local traffic safety documentation. Please check if local laws and/or regulations restrict the use of wireless devices while driving.

Do not store or carry flammable or explosive materials in the same compartment as the device.

Electronic systems in a vehicle, such as anti-lock brakes, speed control and fuel injection systems are not normally affected by radio transmissions. The manufacturer of such equipment may advise if it is adequately shielded from radio transmissions. If you suspect hide problems caused by the radio transmitter in the device, consult your dealer and do not use the device until your device has been checked and has excluded all problems by a qualified technician.

Operating machinery

Full attention must be given to operating the machinery in order to reduce the risk of an accident.

General Guidelines

Some electronic devices may be susceptible to electromagnetic interference. Locate the device away from TV set, radio and other electronic equipment to avoid electromagnetic interference.

- The device may interfere with medical devices like hearing aids and pacemakers. Consult a physician or the manufacturer of the medical device before using the device.
- Do not use your device in dangerous environments such as oil terminals or chemical factories where explosive gases or explosive products are being processed.
- Do not use any unapproved or incompatible power adapter, which may cause fire, explosion or other hazards.
- Please use original accessories or accessories that are authorized by GOSUNCN. Unauthorized accessories may affect the device performance, damage the device or cause danger to you.
- Do not attempt to dismantle the device. There are no user serviceable parts.
- Do not allow the device or accessories to come into contact with liquid or moisture at any time. Do not immerse the device in any liquid.
- Do not place objects on top of the device. This may lead to overheating of the device.
- The device must be used in ventilated environment.
- Do not expose the device to direct sunlight or store it in hot areas. High temperature can shorten the life of electronic devices.
- Use the device within the temperature range of -10°C ~ +55°C, and the storage temperature range is -20°C ~ +70°C. The humidity range is 5%–90%. Use or store the device exceeding the

- temperature range mentioned above might result in shortening the device life or other damage.
- Do not allow children to play with the device.
- Use an antistatic cloth to clean the device. Do not use chemical or abrasive cleanser as these could damage the plastic case.
- Do not use your device during a thunderstorm.
- Do not place the device alongside computer disks, credit cards, travel cards or other magnetic media. The information contained on the disks or cards may be affected by the device.
- Do not paint the device.
- Do not drop, throw, or subject the device to rough treatment.
- Remember to recycle: The cardboard packing supplied with this device is ideal for recycling.
- Do not disassemble or open crush, bend or deform, puncture or shred.
- Avoid dropping the device. If the device is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.

Small Children

Do not leave your device and its accessories within the reach of small children or allow them to play with it. They could hurt themselves or others, or could accidentally damage the device. Your device contains small parts like SIM-card and the OBD pins with sharp edges that may cause an injury or which could become detached and create a choking hazard.

Electrostatic discharge (ESD)

Do not touch the micro-SIM card's metal connectors.

Air Bags

Install the device safely before driving your vehicle. An airbag inflates with great force. Do not place objects, including either installed or portable wireless equipment, in the area over the airbag or in the airbag deployment area. If in-vehicle wireless equipment is improperly installed and the authorized service centre for testing. airbag inflates, serious injury could result.

Emergency Situations

This device, like any wireless device, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless device for

emergency communications.

Electrical Safety

Accessories

Only use approved accessories. Do not connect with incompatible products or accessories. Take care not to touch or allow metal objects, such as coins or key rings, to contact or short-circuit the charger, device charging point or any electrical contacts on accessories. Do not touch your device with wet hands. Doing so may cause an electric shock. Do not touch the power cord with wet hands or disconnect the charger by pulling the cord. Doing so may result in electrocution.

Connection to a Car

Please follow the user manual when install the device into your car.

Faulty and Damaged Products

Do not attempt to disassemble the device or its accessory. Only qualified personnel should service or repair the device or its accessory. If your device or its accessory has been submerged in water or other liquid, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorized service centre and have excluded all problems.

Battery Handling and Safety

The battery in this device is not user removable. Do not make any attempt to remove the battery or disassemble the device to access the battery. Improper use of your device may result in fire, explosion or other hazards. If you believe the battery has been damaged, do not use or re-charge the device and take it to an authorized service centre for testing. Do not puncture or crush the device or allow it to be subjected to any external pressure or force.

Interference

Care must be taken when using the device in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a device and a pacemaker to avoid potential interference with the pacemaker. Use less than this distance might result in cessation of operation for both the device and the pacemaker.

Medical devices

Please consult your doctor and the device manufacturer to determine if operation of your device may interfere with the operation of your medical device.

Interference in cars

Please note that because of possible interference to electronic equipment, some vehicle manufacturers forbid the use of devices in their vehicles unless an external antenna is included in the installation.

Explosive environments

Petrol stations and explosive atmospheres

In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your device or other radio equipment. Areas with potentially explosive atmospheres include fuelling areas, below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

Blasting Caps and Areas

Turn off your device or wireless device when in a blasting area or in areas posted turn off “two-way radios” or “electronic devices” to avoid interfering with blasting operations.

Federal Communication Commission Interference Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection

against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

FCC ID: 2AHR8-AT41
